R = Resistant when used according to supplier recommendations (TDS)
 LR = Limited resistance depending on concentration and exposure time, that may lead to light-to-heavy coating discoloration
 NR = Not resistant at all concentrations

This list provides information on the suitability of various tank cleaning chemicals. Jotun does not advice on specific tank cleaning procedures or regimes, only on the compatibility of the tank cleaning chemicals with Jotun coatings. For detailed advice on cleaning procedures, contact the suppliers of the cleaning chemicals. The tank cleaning chemicals are to be used in accordance with the Technical Data Sheet (TDS) from the supplier with regard to concentration and maximum temperature during cleaning.
